Dating violence among high school students (grades 9-12), 2009^{HR1}

Percent of high school students who:	Arkansas	United States
Were hit, slapped, or physically hurt on purpose by their boyfriend or girlfriend (during the 12 months before the survey)		
Total	17%	10%
Male	17%	10%
Female	16%	9%
Were ever physically forced to have sexual intercourse (when they did not want to)		
Total	13%	7%
Male	11%	5%
Female	15%	10%

Supportive neighborhoods, ages 12-17, 2005-2006^{HR2}

Percent of adolescents ages 12-17 who:	Arkansas	United States
Live in a supportive neighborhood, ^A according to parent		
Total	89%	85%

^ASupportive neighborhood information is reported by parents and is based on the statements: people in my neighborhood help each other out; we watch out for each other's children in this neighborhood; there are people I can count on in this neighborhood; if my child were outside playing and got hurt or scared, there are adults nearby who I trust to help my child. Parents were asked whether they strongly agree, somewhat agree, somewhat disagree, or strongly disagree with each statement. Choosing a "disagree" option on more than one statement removes someone from living in a supportive neighborhood.

Positive social skills, ages 12-17, 2005-2006^{HR2}

Percent of adolescents ages 12-17 who:	Arkansas	United States
Consistently exhibit positive social skills, ⁺ according to parent		
Total	91%	93%

⁺ Positive social skills is a composite measure of four positive social skills. Positive social skills are reported by parents and include respect for teachers and neighbors; getting along well with other children; trying to understand other people's feelings; and trying to resolve conflicts with classmates, family, or friends.

Data notes and data sources

Data from the National Survey on Drug Use and Health and the National Survey of Children's Health have been rounded to the nearest whole number. N/A: data does not exist on this measure for this state.
