

vaccination levels for 2-year-olds to 90 percent for the complete series of recommended vaccine doses against all nine diseases; and  
-finish building a comprehensive vaccine delivery system that reliably guarantees protection to all children.

The following is the Centers for Disease Control and Prevention's (CDC) plan for achieving the CII goals for 1996 and beyond, including major objectives, action steps, and milestones to measure progress. The attached timetable further specifies the approach to accomplishing the 1996 goals. The assistance of key partners is essential to accomplishing these 1996 goals. Such partners include community groups, private health care providers, public health departments, schools, religious institutions, parents, federal agencies, and others.
